

Recommended Label resource settings

Label resource

This resource is a great way to add a heading or other short amounts of information or explanations that appear right on the main screen of the section.

The text can be formatted using **highlighting**, **different colors**, **font sizes** or font types, etc. You can even add an image.

With the proper settings there will be no Activity completion icon for this type of resource.

Click the **Edit** icon below the label resource to open the Edit settings screen.

→ ✎ ⋮

After changing settings always click the "Save and return to course" button on the left side of the Edit settings screen.

This is the default. Unless you don't want students to see the label on the course page, leave it at the default.

Change the Activity completion to "Do not indicate activity completion" so that no activity completion check mark appears on the course page.

There is no need for a check mark to prove that students have seen the label.
