Recommended Lesson activity settings

LESSON

Lesson Activity

This activity is similar to the Book resource in the way you "chunk" the information separate pages. The main advantage to the Lesson activity is that you can also add questions for students to answer to help them know if they understand the materia covered. Their answers can even be included as part of their course grade if desire

One of the criteria on your Self Evaluation form deals with having ways for students to see if they have a "mastery of the content." Besides regular quizzes, using this activity can do that.

If you want to try it out, click the **Lesson acti**

> With the proper settings the Activity completion icon will change to a green check mark once students go through every page of the lesson.
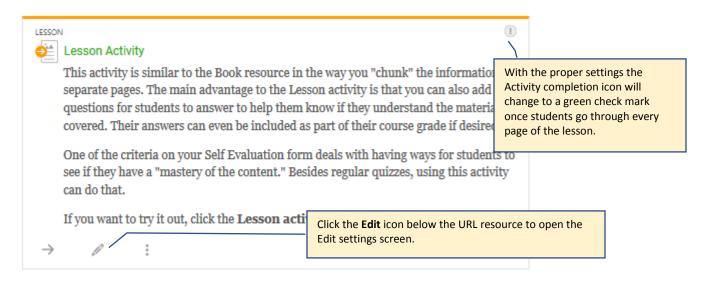

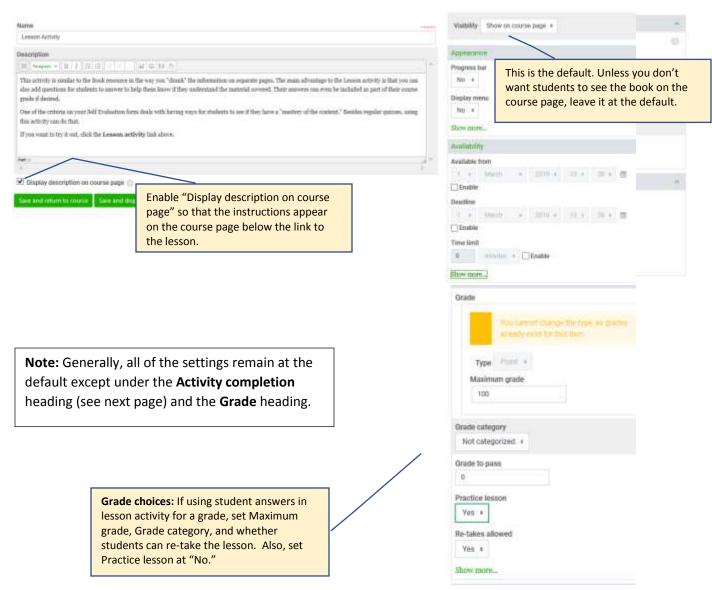

> Click the **Edit** icon below the URL resource to open the Edit settings screen.

After changing settings always click the "Save and return to course" button on the left side of the Edit settings screen.

> This is the default. Unless you don't want students to see the book on the course page, leave it at the default.

> Enable "Display description on course page" so that the instructions appear on the course page below the link to the lesson.

> **Note:** Generally, all of the settings remain at the default except under the **Activity completion** heading (see next page) and the **Grade** heading.

> **Grade choices:** If using student answers in lesson activity for a grade, set Maximum grade, Grade category, and whether students can re-take the lesson. Also, set Practice lesson at "No."

Change Completion tracking to "Show activity as complete when conditions are met" and enable "Student must reach the end of lesson page to complete this activity."

Making these choices will require students to at least click on every page in the lesson. (*Whether they actually read the information or not is their choice.*)
