

Recommended Course Grade Settings

Most students like to see an uncluttered gradebook with only the information they are the most interested in: name of assignment/quiz, grade, possible instructor feedback, course total

The default grade settings include many other pieces of information that can confuse students, so we recommend you enable only the course grade settings shown on the next page.

Use one of these methods to get to the Course grade settings window:

- Click **Gradebook setup** from the Admin gear icon, then select the **Course grade settings** tab.
- Click **Gradebook** from the Course Dashboard, select the **Setup** tab, then select the **Course grade settings** tab.

Once the settings on the next page are chosen, this is what the students will see:

Course Dashboard
Erika Rodriguez

Progress 13% Grade 70%

Moodlerooms Grader Gradebook 15 Participants

Students can see current course total here for the course they are logged into.

Students click **Gradebook** to see their user report.

User report -

Overview report User report

Grade item	Grade	Feedback
BUSI 1301		
Chapter Quizzes		
Chapter 1 Quiz	90	
Chapter 2 Quiz	85	
Discussion Forums		
Ice Breaker Discussion Forum	100	To see the rubric used to grade this forum, click Moodlerooms Grader located on your Course Dashboard.
Chapter 1 Discussion Forum	0	
Course total Weighted mean of grades.	70	

If you enable the recommended course grade settings, students will only see assignment/quiz names, grades, feedback, and course total in their user report.

Overview report User report

If students click **Overview report**, they can see current course totals for all of their courses.

Course name	Grade
