

Log into Moodle course as a specific student

There are times when a student is having trouble and your being able to log in as that actual student would help you see exactly what the student is seeing. There are **two methods** to do this, and both are very simple. Follow the instructions below.

Method 1:

The screenshot shows the Moodle Course Dashboard. A red arrow points from the '15 Participants' tile to a callout box. Below the dashboard, the user profile for Erika Rodriguez is shown. A red arrow points from the 'Log in as' link to another callout box. Below the profile, a confirmation message 'You are logged in as Erika Rodriguez' is displayed with a 'Continue' button. A red arrow points from the 'Continue' button to a third callout box. At the bottom, a green header bar shows the user's name 'Erika Rodriguez' and a 'Log out' link. A red arrow points from the 'Log out' link to a final callout box.

Step 1: Click **Participants** on your Course Dashboard.

Step 2: Click “Log in as” beside the appropriate student.

Step 3: Click “Continue”.

When finished looking at the student’s course, log out so you can log back in as yourself.

Method 2:
