

Creating Recordings in Yuja

Before creating your first recording, you need to install the **Yuja Software Capture to PC** app.

Follow these instructions to do that.

Log into your Yuja account.

Click this icon, then choose **My Account**

Downloads

YuJa Software Capture for PC

Express Installer [47 MB]

Full Installer [125 MB]

Chose **Full Installer** if
your computer is a PC

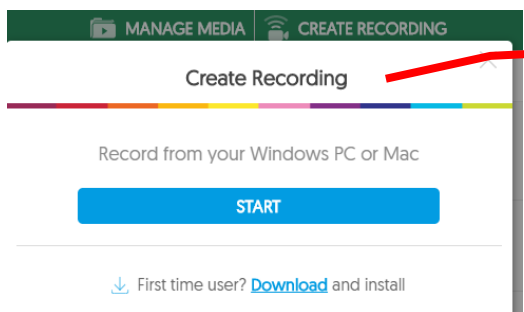

YuJa Software Capture for Apple

Installer [28 MB]

Beta Installer [25 MB]

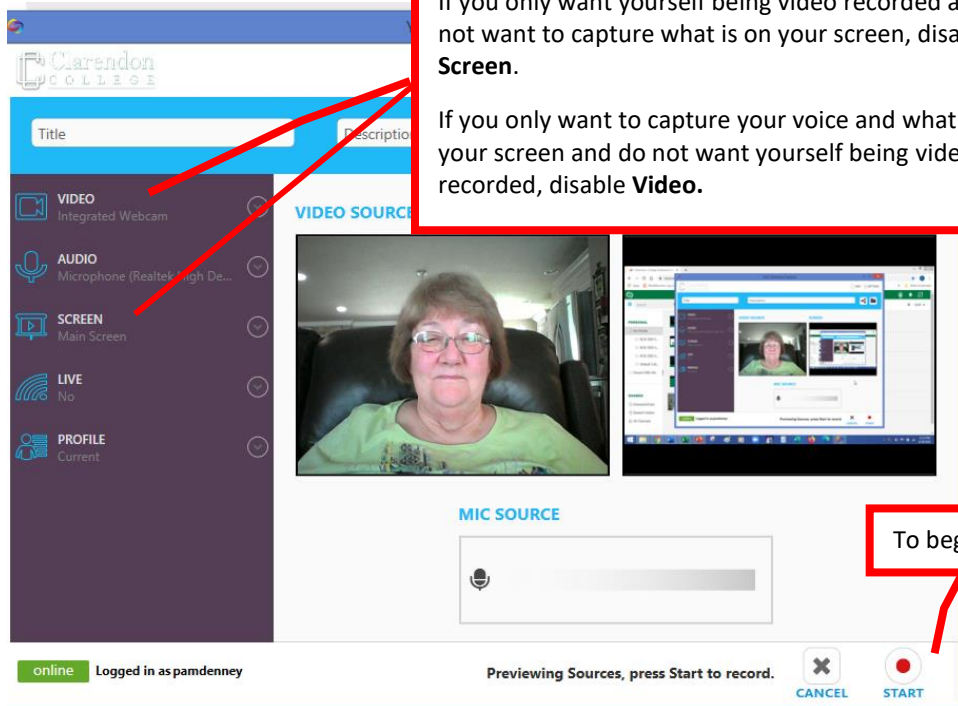

Follow the prompts to
install the program.

Once you have the software capture app installed, click **CREATE RECORDING** in Yuja.

Click **START** when you are ready to make a recording.

You have the option to record a video of yourself talking or record a video of what you see on your screen (or both).

If you only want yourself being video recorded and do not want to capture what is on your screen, disable **Screen**.

If you only want to capture your voice and what is on your screen and do not want yourself being video recorded, disable **Video**.

To begin recording, click **START**.

When you press the *Start* button, you'll have three seconds before recording begins. Use this time to bring up your files or presentation material on screen. If you're capturing your screen. Proceed with your recording – try to speak clearly and naturally.

When done recording, click the Finish button in the bottom right of your screen.

Notice you also have the option of pausing your screen during your recording.
