

Change your default Moodle email

If you want your Moodle emails to go to a different email than your Bulldogs Mail, follow these instructions.

The screenshot shows the Moodle user profile page for 'Donald Duck'. At the top, there is a green header with a profile picture of Donald Duck, the name 'Donald Duck', and navigation links: 'Profile - Preferences - Grades - Log out'. Below this is the 'User details' section with links for 'Edit profile' and 'Preferences'. The 'General' section contains form fields for 'First name' (Donald), 'Last name' (Duck), 'Email address' (donald.duck@bulldogsmail.com), and 'Email display' (Hide my email address from everyone). The 'Additional names' and 'Interests' sections are also visible. A red box highlights the 'Email address' field with the instruction 'Change email address'. Another red box highlights the 'Update profile' button with the instruction 'Click Update profile at the bottom of the Profile screen.' A third red box points to the 'Profile' link in the header with the instruction 'On your My Courses page, click Profile.'
